

# Instalación PHP en Eclipse

## 1-Abrir eclipse e ir a Help-> Eclipse Marketplace...

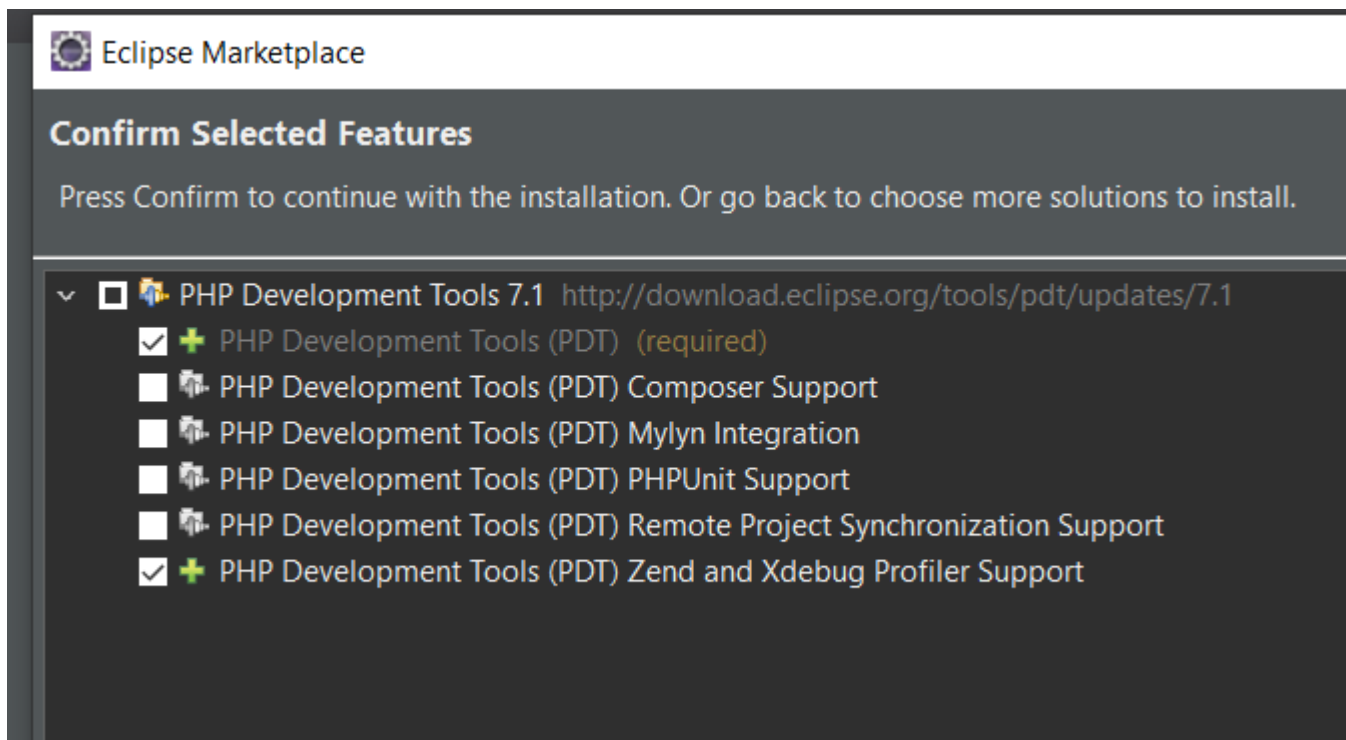

## 2-Seleccionar del menú “Programming Languages-> PHP Development Tools (PDT) SDK Feature.”

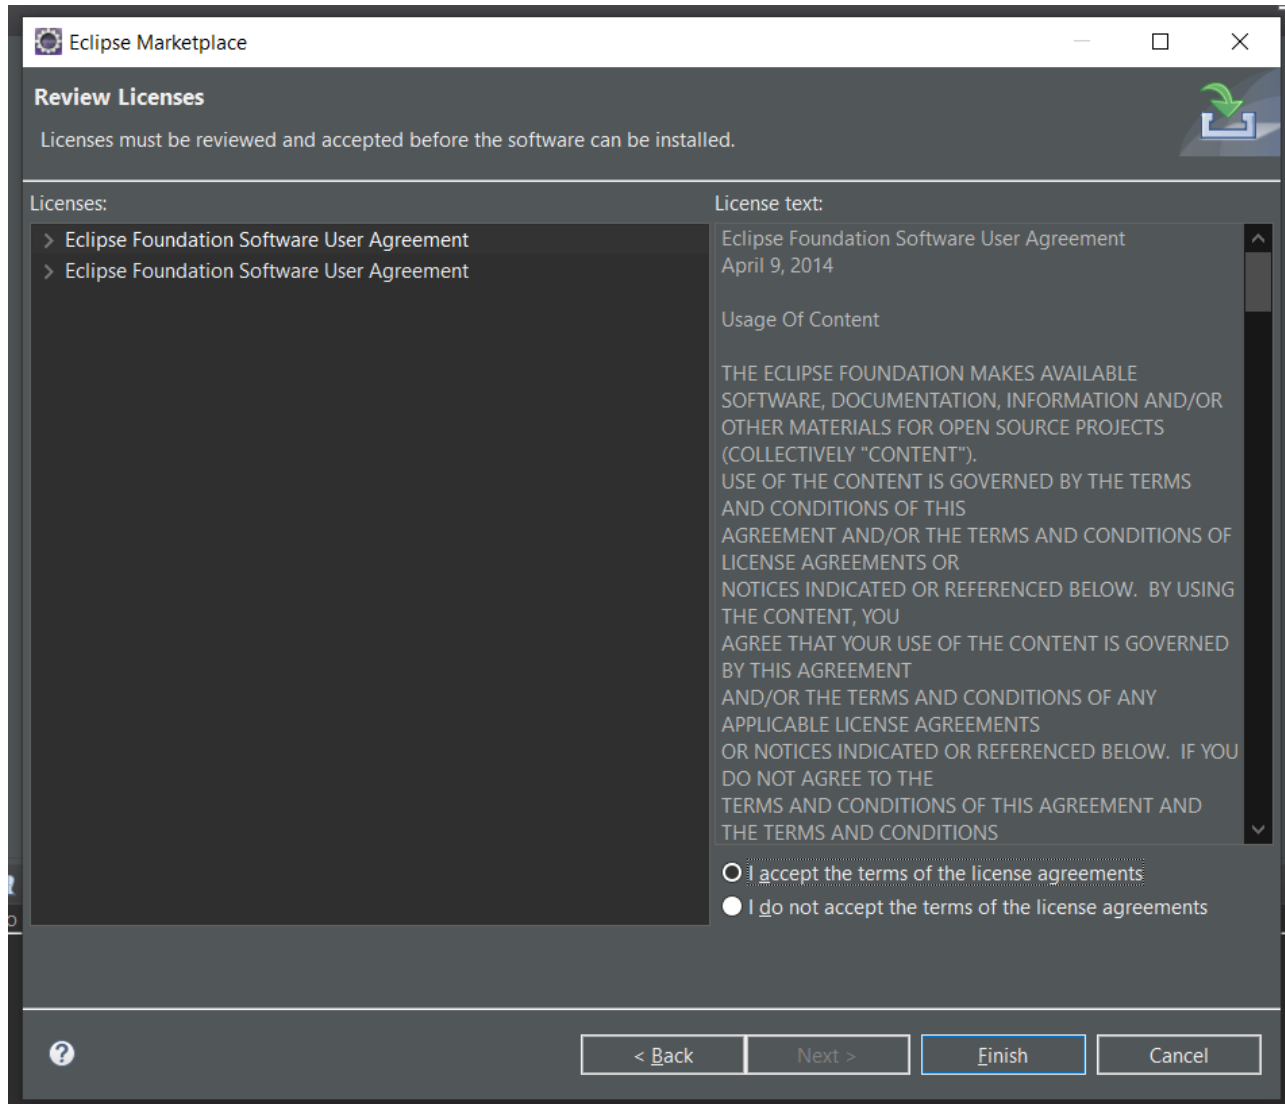

\*Click en install.

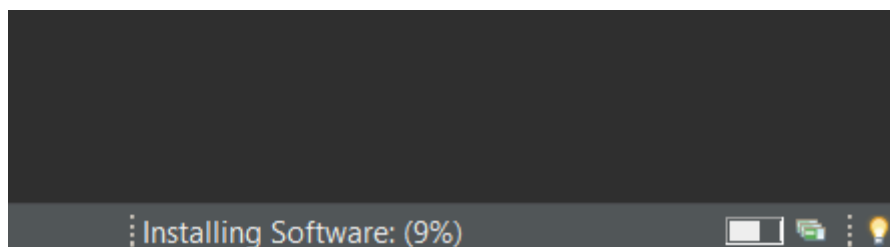

3-Marcar el checkbox de “Zend CE Features”, y Click en Confirm.

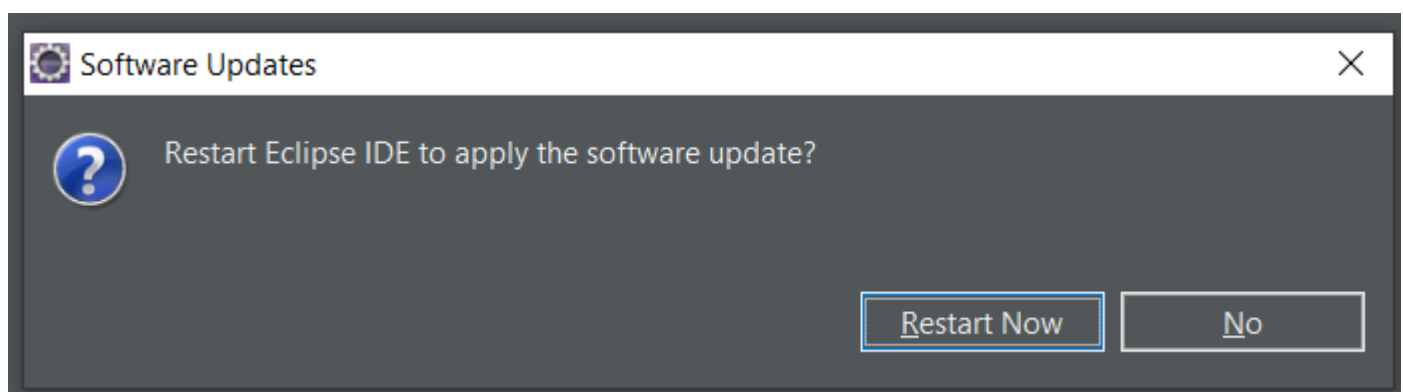

4-Aceptamos los siguientes acuerdos y damos click a Finish.

\*Eclipse pasará a descargar el plugin en segundo plano

5-Reiniciar Eclipse.

Finalmente el plugin PHP quedará instalado en nuestro Eclipse:
